

We are a tour operator and we have been in the tourist market since 2002. From 2002 to 2004 we organised mainly package tours to Mediterranean countries: Greece - the Olympic Riviera, Zakynthos and Corfu.

In 2004 we started organising incoming tours for foreign tourists in Poland

Owing to our four-year experience in tour operating and two years of organising theme trips for foreign secondary school students we have been able to create a number of interesting and competitive tourist programs.

In 2004, 2005 and 2006 we organised theme trips connected with school curriculum for secondary school students from Italy. In 2004 the number of students participating in our tours amounted to **296**, in 2005 - **479** students, in 2006 (by May) - **536** students. So far we have organised tours for 19 schools from the entire Italy. As we have received a number of queries from secondary schools in Germany, we have decided to prepare special offers for German students

Our tours are carefully designed so that you may enjoy these places in Poland which are both unique and fascinating as far as history, culture and nature are concerned. The price includes: transfer to Poland depending on the departure city (air or coach transport), accommodation at 3* hotels, full board (3 meals daily) or half board (2 meals), transportation in Poland, tour guide as well as all entrance fees and charges. With such a wide range of services included in the price you do not need to worry about any additional costs - you may simply enjoy your stay in Poland, resting and getting to know our country. Your satisfaction is our main concern. Over the years our clients have sent a lot of letters to thank us for perfect, professional organisation of the tours. We organise our tours in a reliable, professional way and always bear in mind individual needs of our clients.

By choosing one of our tours you will spend your holidays in a trouble-free, comfortable atmosphere which will turn your meeting with Polish culture, folklore and nature into an unforgettable experience.
